RoadLazer RoadPak™ Systems

PROVEN QUALITY. LEADING TECHNOLOGY.

RoadLazer RoadPak System.

Quality. Performance.
Durability. Productivity.

Since 1997 Graco's RoadLazer has been the "go to" system for many road and airport striping applications.

The modular design of the RoadPak System allows you to customize for your individual needs.

New for 2018, the RoadPak HD has twice the output, a larger bead tank and RoadPak Advanced Controller - allowing you to tackle those large, complex, multiple-gun applications. In addition to this, Graco has added a rear seat with steerable carriage for those applications that require precise control.

No matter what RoadLazer System you choose, you can take pride in the fact that all Graco RoadLazer Systems are designed, manufactured, and assembled right here in the United States of America.

What is the G4 Difference? Simply put, it's Graco's commitment to provide you with the very best sprayers, backed by a solid reputation for proven quality, maximum performance, reliable warranty coverage and unmatched on-the-job productivity. Graco sprayers are designed to exceed the professional contractor's standards for quality and performance. Graco is the name to turn to today and as your business grows.

NOBODY ELSE BUILDS A ROADPAK SYSTEM LIKE GRACO

PROVEN QUALITY

Precision design, 100% factory-tested and field-proven. Cutting-edge technology keeps Graco RoadPak Systems up and running for years.

MAXIMUM PERFORMANCE

Higher output with superior control ensures highest quality for every job.

INDUSTRY LEADING WARRANTY

Every Graco RoadPak System is backed by our superior warranty coverage and more than 80 years of proven commitment to the road striping professional contractor.

UNMATCHED PRODUCTIVITY

Superior design and innovative technology means you'll be getting the highest productivity in a RoadPak System – *only from Graco.*

PRODUCTS INCLUDE PATENTED AND PATENT PENDING TECHNOLOGIES.

RoadLazer Applications

AIRPORTS

Airports offer professional striping contractors opportunities to add on to their existing striping jobs.

HIGHWAY RAMPS

A wide range of striping opportunities can be found with highway entrance and exit ramps.

LONG LINES

The RoadPak System's high productivity means that you can now stripe with high production speeds normally only found on Long Line trucks.

EDGE LINES

Road edges are never straight but that's no problem for the RoadPak System. With this striper you'll see for yourself how easy it is to stripe these jobs.

PARKING LOTS

Parking lots used to only be reserved for walk behind units. Now with the larger "mega" malls the norm, you can stripe these faster and more efficiently with a RoadPak System.

CONSTRUCTION ZONES

Temporary construction zones offer additional incremental striping opportunities.

INTERSECTIONS

From crosswalks to arrows there are many ways to earn more money with the RoadPak System.

CURVES

By having the striping guns mounted closer to the rear axle of the vehicle, it assures a more normal striping flow for the operator without having to worry about over steering.

RoadView HD Camera System

WORK SMARTER, FINISH JOBS FASTER

ROADVIEW HD CAMERA SYSTEM

The RoadView HD Camera System allows single users to do the jobs once reserved for the “big trucks” – all from the comfort from inside the striping vehicle.

This camera mounts on the gun arm and will travel from one side of the truck to the other without any adjustments needed. The view of the camera allows users to see from behind the paint and bead guns, which is very similar to the view from a walk behind unit.

A quick disconnect electrical system for the camera allows for safe storing when not using and also allows you to switch between the standard 16 mm or optional 6 mm camera. The 16 mm camera provides a “farther-out” view, while the 6 mm camera option is a great choice for those striping contractors who prefer a “closer-in” view.

It's easy to match up old stripes with the remote, hand activated Switch System. With a push of your thumb you control the start and stop on those tough restripe jobs.

LAZERGUIDE 3000 LONG-LINE LASER

LAZERGUIDE 3000 LONG-LINE LASER

Replace your clunky mechanical pointer with the LazerGuide 3000 Long-Line Laser and achieve laser straight lines with ease. Ideal for airports, roads, large intersections, or anywhere a straight line is needed.

LAZERGUIDE 3000 LONG-LINE LASER FEATURES

Accurate

- ▶ Produce straighter lines by extending your reference point up to 30 feet – a distance not possible with a mechanical pointer.

Highly Visible

- ▶ Powerful, “large dot” laser is visible even on the sunniest of days.
- ▶ “Blink Mode” allows you to more quickly locate the laser on all surfaces.

Safer

- ▶ Put the laser into your natural driving field of view for safer operation.
- ▶ Paint intersections without the worry of injury or damage caused by an extended mechanical pointer.

Faster, Simple Operation

- ▶ No mechanical pointer to get it the way – greatly increasing your maneuverability.
- ▶ No need to get off the machine. Just line it up and go!

RoadPak Advanced Controller

WORK SMARTER, FINISH JOBS FASTER

Use Defined Presets

- ▶ Advanced patterns are built into the controller for quick recall

Pattern Preview

- ▶ Pattern preview gives a quick visual of colors and patterns selected
- ▶ Export capabilities allows for "proof of job"

5-Gun Toggle Control

- ▶ Toggle switch for all 5 guns allows for quick activation and control
- ▶ Spend less time setting up and more time putting down lines!

Spray Tip and Bead Recommendations

For road striping we offer two high quality tips – the RAC® 5 SwitchTip™ and the LineLazer RAC 5 SwitchTip. Both will deliver high quality lines and have proven their worth over the last 20 plus years of being used by professional stripers worldwide.

Every tip is 100% tested for flow rate to meet our tough standards for the professional striping contractor.

Remember: Worn tips cost time and money by using more paint, producing uneven coverage and mil build plus it shows in the imperfect line quality. With Graco tips, you'll get longer life and excellent line quality.

Striping Tip Recommendations

Line Width	Stencil	3 (5) to 4 (6)	4 (6) to 5 (8)	5 (8) to 6 (10)	7 (11) to 8 (12)	8 (12) to 9 (14)
