

Reactor™ Spray Foam and Polyurea Equipment

For fast-set plural-component applications

PROVEN QUALITY. LEADING TECHNOLOGY.

Graco Has You Covered

No matter what the application, Graco has the solution

Whether you're spraying foam or applying polyurea coatings, Graco Reactor® Plural-Component Systems help you get the job done with superior results. Available in air, electric or hydraulic technology – we have the right equipment to meet your needs.

Which system is right for you?

Technology types: A = air; E = electric; H = hydraulic

Portable and Touch-up Systems

Entry-level Systems

Mid-production Systems

High-production Systems

SPRAY FOAM APPLICATIONS		COATINGS APPLICATIONS		SPRAY FOAM APPLICATIONS		COATINGS APPLICATIONS		SPRAY FOAM APPLICATIONS		COATINGS APPLICATIONS

Three-Year Extended Warranty

We stand behind every piece of equipment we manufacture with one of the industry's strongest warranties. Spray with the confidence that you will probably never need to use Graco's warranty, but if you do – Graco Has You Covered.

Reactor 2 systems offer a three-year extended warranty on control modules, display module and electric motor (E-series only). See product manual for specific warranty details.

Understand Spray Performance

Performance charts with mix chamber choices

Use these charts to help identify the system that will work most efficiently with each mix chamber. Flow rates are based on a material viscosity of 60 cps and a 50 Hz power line frequency.

How to use these charts

- Select spray pressure
- Select mix chamber or flow rate
- Choose equipment model

Note: Darker shading includes equipment models shown in lighter shaded areas.

Spray Foam Example

Mix chamber: AR6060 (03)

Pressure: 85 bar (1250 psi)

Flow rate: 10 kg/min (22 lb/min*)

Reactors H-30, E-30, H-40, H-50

Coatings Example

Mix chamber: AR2929 (00)

Pressure: 105 bar (1500 psi)

Flow rate: 3,4 l/min (0.9 gpm*)

Reactors E-XP1, E-XP2, H-XP2, H-XP3, E-10hp

**Output of flat tip will be slightly less than round equivalent*

Applications

Spray Foam

- Residential & commercial wall insulation
- Aerospace
- Concrete lifting
- Rim and band joist
- Roof insulation

Protective Coatings

- Adhesive and caulking for flooring
- Decorative coatings
- Marine and shipbuilding
- Tank and pipe coating
- Waterproofing
- Wastewater treatment
- Truck bedliners

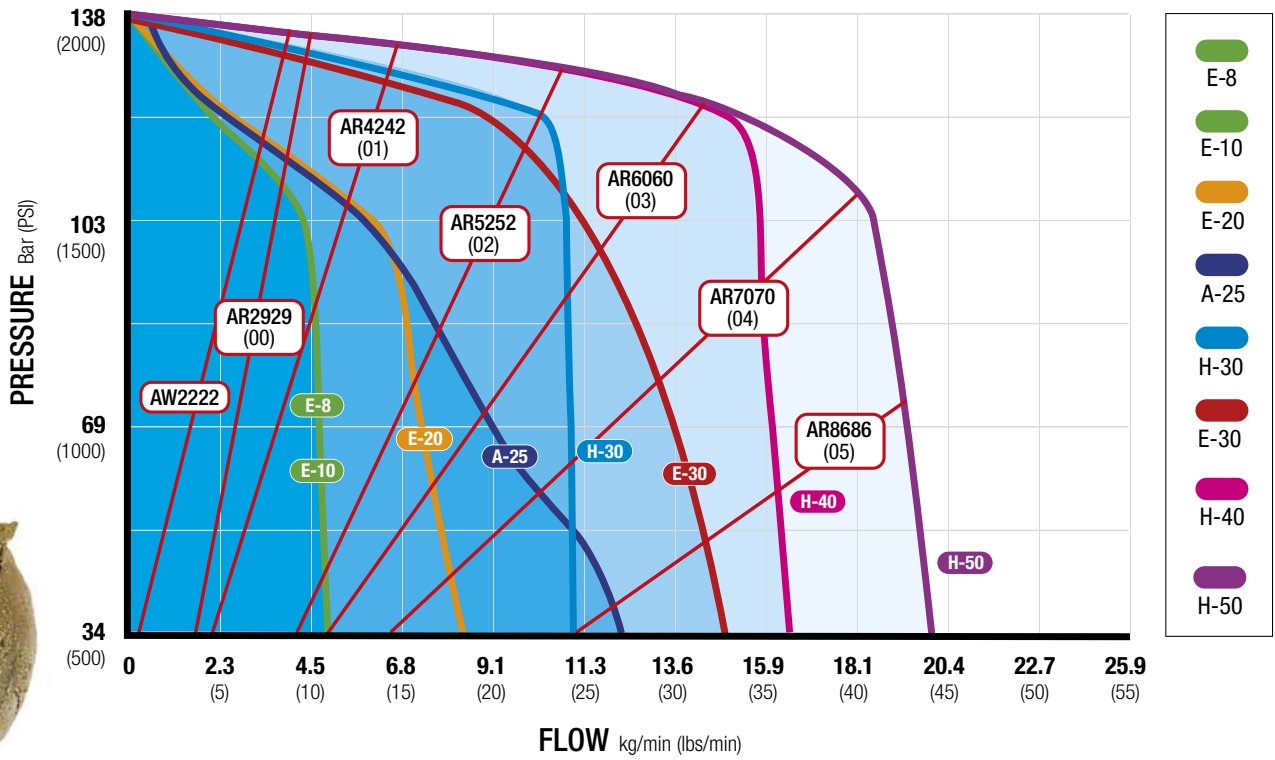

Electric unit performance curves are based on typical spraying conditions. Periods of continuous spraying or very high ambient temperatures reduce the performance envelop. Hydraulic system performance curves allow for continuous spray conditions.

EQUIPMENT

Advancing the Industry

Like you, we want customers to be completely satisfied with their spray foam and coatings application investment. Graco's goal is to provide equipment advancements that help you and your crews apply materials more accurately and more efficiently – as the material suppliers intended, to help grow your business.

Better control

Advanced control technology

Advanced Display Module (ADM) is the standard interface for all Reactor 2 systems. With the ability to track, monitor and save project information, the ADM also has the ability to download data onto a USB drive for further analysis.

Screen shown:

*Drum fluid levels – easy indication when you are running low on chemical.
One of many screens available on the ADM.*

Easier to service

Reduce your downtime with QR codes

Error codes appear on your ADM with a helpful QR code. The QR codes explain the problem and provide solutions by simply scanning the code with your smart phone or device. The scan takes you directly to help.graco.com that provides up-to-date advanced trouble shooting information.

Peace of mind

Advanced electronics

Graco designed the electronics in the Reactor 2 systems to a stringent electronics reliability standard. These modules are more robust and able to withstand a wider range of power spikes or surges.

Sacrificial Surge Protector for added protection

As an added level of protection, Graco also added a sacrificial surge protector to Reactor 2 systems. If there is an excessive power spike, you only have to replace this smaller, less expensive part – not the entire control module. All Reactor 2 models include a spare sacrificial surge protector to get you back up and running immediately.

New Reactor Technology

Ratio Assurance

Since no single method can easily and accurately detect all potential issues that may cause off-ratio foam or polyurea to be sprayed, Graco has designed a multi-tiered system with built in redundancies that will provide the best results in monitoring and maintaining on-ratio spraying.

A robust Ratio Control System is more than just flow meters:

- Mechanically linked pumps
- Outlet pressure monitoring
- Positive displacement piston pumps
- Flow meters
- Inlet pressure monitoring

Ratio Assurance is now included with all new Reactor 2 elite models. Retrofit kits are available for any Reactor 2 model in the field.

For more information visit:

www.graco.com/ratioassurance

Reactor Connect

The Reactor Connect App lets you view your fleet and make real time adjustments to your proportioner all from your smartphone.

Sprayers:

- Control your Reactor 2 with your phone
- Save time when you're spraying. Adjust the Reactor without having to go back to your rig.

Owners/Managers:

- Monitor your rigs/crews with the multi-system dashboard
- Troubleshoot an issue quickly by being able to see real-time machine conditions
- Provide documentation to a customer that material was sprayed on-ratio to the manufacturers specs
- Use reports to better understand your business, your equipment and your employees
- Have your spray data saved to the cloud

For more information visit:

www.graco.com/reactorapp

www.reactorconnect.graco.com

Portable & Touch-up Systems

WHAT PORTABLE & TOUCH-UP SYSTEMS CAN DO FOR YOU:

- **Save time** – get smaller jobs done fast without sacrificing performance
- **Self-contained system** – no transfer pumps required
- **Easy to use** – single knob motor operations
- **Provides consistency** – uses standard spray guns you're familiar with

REACTOR E-10

Save up to 30% on material costs compared to disposable foam systems

Reactor E-10 sprayers are ideal for plural-component spray, joint-fill jobs and touch-ups. One person operation saves time and money!

Intuitive Controls

- Easy start and stop
- Digital temperature display

Heater and Hose

- Gives up to 2000 watts to pre-heat circulating material

Electric Motor

- Improved performance
- Reduces operating costs

Power

- Electric power is a low draw and plugs into standard outlets

REACTOR E-10HP

Fast start-up time for improved productivity

Expand your business with polyurea applications. The Reactor E-10hp sprayer is a smart, affordable investment that will help grow your business. Even though it's an entry level system, it packs plenty of power and uses standard residential electrical outlets – no generator is needed.

Low Level Sensors

- Indicates when material is low (3.8 L / 1 gal remaining)
- No contact with materials – prevents build-up

Boost Heat

- Directs unused power from the motor circuit to additional heater rods
- Additional heater power brings material to desired temperatures faster during recirculation mode

Insulated Tanks

- Double-wall insulated to retain heat
- Smooth interior lining for easy cleaning
- Improved seal design on lid for better moisture control

Quick knockdown Lower Pumps

- Easy disassembly and maintenance

Temperature Gauges in Y-strainers

- Provides accurate tank temperature readings

Digital Heat Controls

- Allows you to enter the exact temperatures you need
- Uses the same control boards as a standard Reactor

Motor

- Provides improved spray performance with reduced pressure drop

Robust Hybrid Heater

- More power, faster material handling means more uptime

Entry Level Systems

WHAT AN ENTRY LEVEL SYSTEM CAN DO FOR YOU:

- **Easy to manoeuvre** – wheeled carts let you get closer to the job
- **Easy to use** – best for low to medium-output applications
- **Affordability** – excellent value for residential and commercial use

REACTOR E-20 & E-XP1

Durability you've come to expect

Equipped with material data and system diagnostics, the Reactor E-20 and E-XP1 systems provide total control for spraying foam insulation and coatings.

Reliability

- Powerful hybrid heaters
- Accurate heating with precise temperature sensing

Simple Control

- Digital heat and pressure controls

Heater Control Boards

- Longer-lasting modular heater
- Minimize downtime

Pumps

- Quick knockdown for easy maintenance

Hose Heat Transformer

- Does not require tap settings

REACTOR A-25 & A-XP1

Best choice for affordability

The Reactor A-25 and A-XP1 system has the ability to maintain consistent temperature control, even when you're spraying at maximum flow rates – resulting in better quality foam or coatings. Have peace of mind with the proven durability of a standard Graco quality air motor.

Three Heat Zones

- Three independent heat zones – ISO, resin and hose heat
- Provide accurate heat control for reliable spraying to handle different chemical viscosities
- Digital temperature controls

Recirculation Manifold

- A quick, easy way to balance system pressures

Hybrid Heater

- Provides better temperature control

DataTrak™ Control

- Resettable counter tracks material usage

NXT® Air Motor

- Low air consumption for increased efficiency
- Muffler provides low operating noise levels
- Air valve provides smooth and rapid changeover

ISO Pump Lube System

- Prevents isocyanate crystallization on the pump seal and shaft

Quick Knockdown Pumps

- Allows for easy service
 - Fast disassembly

Mid-production Systems

WHAT AN ELECTRIC SYSTEM CAN DO FOR YOU:

- **Increase productivity** – plenty of power for most residential and commercial applications
- **Smooth and consistent spray pattern** – minimizes pressure fluctuations on pump changeover
- **Free up space in trailer or rig** – smaller footprint when compared to other spray systems

REACTOR 2 ELECTRIC SERIES

Proven reliability at an outstanding value

With proven reliability the Reactor 2 E-series is the industry's preferred system. Reactor 2 models are available as an E-30 and E-XP2. Additional mid-production models include the H-30 and H-XP2. These models and their details are found on page 14.

Advanced Controls

- Easy to operate Advanced Display Module interface
 - Reactor Connect App included with all models

Ergonomic Set-up

- Electronics are above the pumps – comfortable working height for easier service
- 40% smaller footprint than traditional Reactor E-30

Brushless Electric Motor

- Improved control and performance
 - No maintenance needed
 - Longer life

Easy Troubleshooting Diagnosis

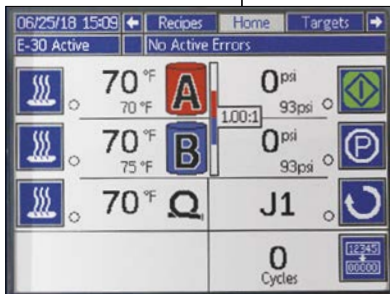

- Troubleshooting Y-strainer for analog temperature and pressure gauges
 - Inlet pressures and temperatures sensor are displayed and recorded on ADM and Reactor App

Resistance Control Mode

- Provides full hose temperature control without RTD cables or Fluid Temperature Sensor
 - Increased material yield and productivity
 - Less downtime and repair costs

Standard

Ratio Display

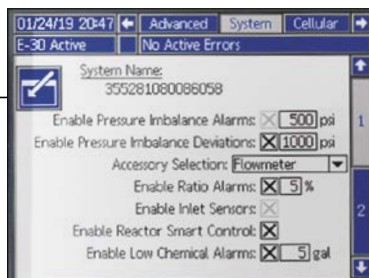

Reactor Smart Control

- RSC will automatically make adjustments to the Reactor to attempt to prevent off-ratio dispensing.
*only available for E-30 & E-XP2 models

ADM Set-up: System Screen

- Updated ADM set-up screen to allow easy configuration of flow meters and enabling alarms

Oval Gear Flow Meters

- Simple and robust design
- Ideally suited for high flow rate measurements
- Accuracy of $\pm 1\%$ once factory calibrated

Elite Models

- Flowmeters comes factory installed
- Inlet pressure and temperature sensors included
- Xtreme-Wrap™ Scuff Guard on heated hoses when ordered as a package

Elite

High-production Systems

WHAT A HYDRAULIC SYSTEM CAN DO FOR YOU:

- **Dependability** – robust, durable, longest life spray system
- **Reduce downtime** – allows for longer time in between required maintenance
- **Increase daily productivity** – capable of extremely high duty cycle

REACTOR 2 HYDRAULIC SERIES

Highest value for the best performance

Graco's line of hydraulic Reactors brings increased yield and performance to high-output spraying. Ideal for in-plant OEMs or applicators that spray high volume. Reactor 2 stand-alone models are available in an H-30, H-40, H-50, H-XP2 and H-XP3.

Advanced Controls

- Easy to operate Advanced Display Module interface
- Reactor Connect App included with all models

Ergonomic Set-up

- Electronics are above the pumps – comfortable working height for easier service

Voltage Jumpers

- Available on H-30 and H-XP2 (Inside Electronics Cabinet) allows for one model to be wired to different voltages

Horizontal Pump Line

- Slower cycle rate

Easy Troubleshooting Diagnosis

- Troubleshooting Y-strainers for analog temperature and pressure gauges
- Inlet pressure and temperature is displayed and recorded on ADM and Reactor App

Reversing Sensors

- Non-contact for longer life

Consistent Design

- Similar footprint to traditional H-series

Elite Models

- Flowmeters come factory installed
- Inlet pressure and temperature sensors included
- Xtreme-Wrap™ Scuff Guard on heated hoses when ordered as a package

Oval Gear Flow Meters

- Simple and robust design
- Ideally suited for high flow rate measurements
- Accuracy of $\pm 1\%$
- Included on elite models
- Kits available to add to all Reactor 2 models

Resistance Control Mode

- Provides full hose temperature control without RTD cables or Fluid Temperature Sensor
- Increased material yield and productivity
- Less downtime and repair costs

1 SELECT A SYSTEM

Choose an air, electric or hydraulic model.

KEY FEATURES:

- Optional data reporting capabilities
- Foam models rated at 138 bar (2000 psi, 13.8 MPa)
- Coatings models rated up to 240 bar (3500 psi, 24.0 MPa)

2 SELECT HEATED HOSES

Choose from pressure ratings of 138 to 240 bar (2000 psi or 3500 psi, 13.8 to 24.0 MPa).

Choose 3/8 in or 1/2 in ID.

3 SELECT HEATED WHIP HOSE

Choose from pressure ratings of 138 to 240 bar (2000 psi or 3500 psi, 13.8 to 24.0 MPa).

Choose 1/4 in or 3/8 in ID.

4 SELECT A GUN

Choose an air-purge, mechanical-purge or liquid-purge gun with a round or flat pattern.

SELECT SUPPLY PROCESSING EQUIPMENT

5 SUPPLY PUMP

Choose from diaphragm or piston pumps for standard materials in drum-mount or wall-mount. Select a 2:1 or 3:1 piston pump for materials with higher viscosities.

6 AGITATOR KITS

Choose a kit to agitate your resin for a consistent coating. Graco's expandable blade agitators are very low shear to minimize material frothing.

For details on hoses, guns and accessories, see brochure 349104.

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
